

Forms Lab

In this lab we'll create a checkout form.

1. Create a checkout.html page.
2. Don't worry about styling the page. We'll deal with that later. But do add the features below.

The image shows a web browser window displaying a checkout form. The browser's address bar shows 'localhost:3000/...' and the page title is 'View cart/Checkout'. The form is titled 'Where shall we ship this?' and includes several input fields for shipping information: 'Name to ship to:', 'Address:', 'City:', 'Region/State:', 'Zip/Postal Code:', and 'Country:'. Below these is a section titled 'How shall we ship it?' with a 'Shipping method:' dropdown menu showing 'Next Day - \$100'. The next section is 'How would you like to pay for it?' with a 'Credit card number:' input field, an 'Expiration:' dropdown menu, and a checkbox labeled 'Remember this credit card number for next time I check out.'. A blue 'Place Order*' button is at the bottom. The form is annotated with several green boxes and arrows: 'Header section' points to the top navigation bar; 'Form for shipping address' points to the shipping address fields; 'Dropdown list' points to the shipping method dropdown; 'Must look like a credit card number' points to the credit card number input field; 'Select lists for month and year' points to the expiration date dropdown; 'Checkbox' points to the 'Remember this credit card number...' checkbox; and 'Submit button' points to the 'Place Order*' button.

View cart/Checkout

localhost:3000/...

Northwind Traders Things to do - Your cart 0 Welcome! Log in Search

Where shall we ship this?

Name to ship to:

Address:

City:

Region/State:

Zip/Postal Code:

Country:

How shall we ship it?

Shipping method:

Next Day - \$100

How would you like to pay for it?

Credit card number:

Expiration: -- --

☐ Remember this credit card number for next time I check out.

Place Order*

Header section

Form for shipping address

Dropdown list

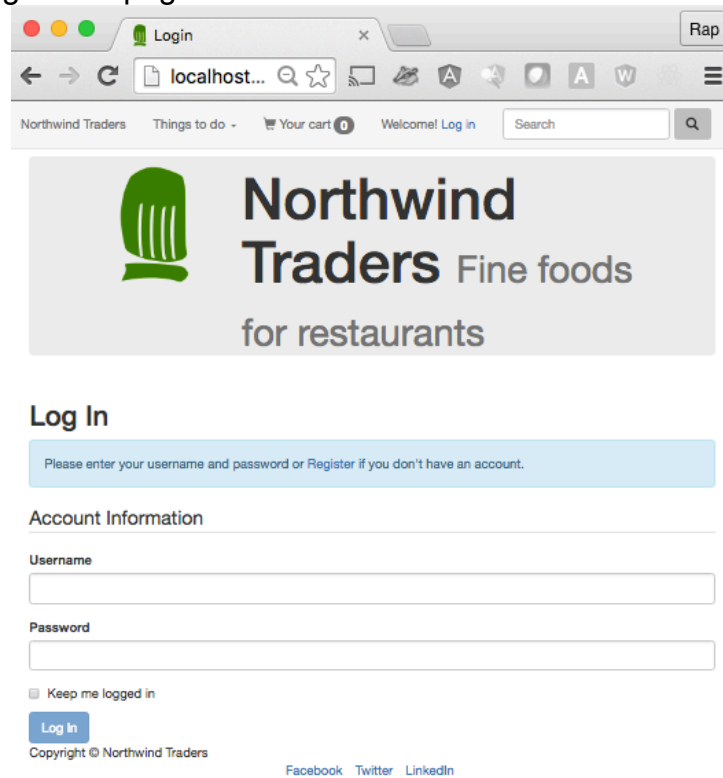

Must look like a credit card number

Select lists for month and year

Checkbox

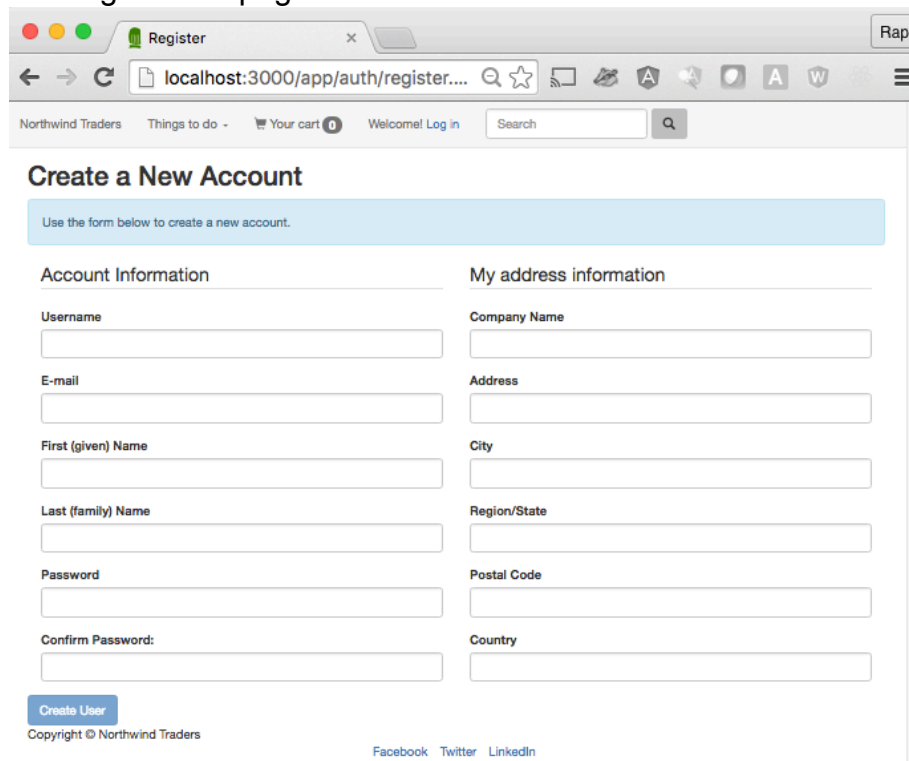

Submit button

3. Create a login.html page

The screenshot shows a web browser window with the title "Login". The address bar shows "localhost...". The page header includes "Northwind Traders", "Things to do -", "Your cart 0", "Welcome! Log in", and a search bar. The main content area features the Northwind Traders logo (a green fork) and the text "Northwind Traders Fine foods for restaurants". Below this is a "Log In" section with a light blue box containing the text "Please enter your username and password or Register if you don't have an account." The "Account Information" section contains two text input fields labeled "Username" and "Password". Below these is a checkbox labeled "Keep me logged in" and a blue "Log In" button. The footer includes "Copyright © Northwind Traders" and social media links for Facebook, Twitter, and LinkedIn.

4. Create a registration page

The screenshot shows a web browser window with the title "Register". The address bar shows "localhost:3000/app/auth/register...". The page header is identical to the login page. The main content area features the text "Create a New Account" and a light blue box containing the text "Use the form below to create a new account." The registration form is divided into two columns. The left column, titled "Account Information", contains text input fields for "Username", "E-mail", "First (given) Name", "Last (family) Name", "Password", and "Confirm Password:". The right column, titled "My address information", contains text input fields for "Company Name", "Address", "City", "Region/State", "Postal Code", and "Country". A blue "Create User" button is located at the bottom left of the form. The footer is identical to the login page.
